

FREE MEDICAL ASSISTANT TRAINING

PROGRAM BEGINS: SEPTEMBER 7, 2022

1 YEAR PROGRAM • 2 SEMESTERS
FULL-TIME CLASSES • 29 COLLEGE CREDITS

Employer requirements for medical assistants in Western Massachusetts are changing as healthcare changes. The quality and standards for training programs varies widely, with no statewide certification standards. Bilingual medical assistants are particularly in demand. Medical assistants help doctors, nurses and other medical professionals with both administrative and clinical tasks, most often in a physician's office. Care for patients directly by taking and recording vital signs and medical histories, preparing patients for examination, drawing blood, and administering medications as directed by a physician. They keep medical offices running smoothly by scheduling appointments, keeping medical records, billing, and insurance coding.
